1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

NOTES

Fleetguard®

Nothing Guards Like Fleetguard

NanoNet | Injector Protector.

Up To **10x Better Protection** Against Contaminants.

Studies show an increasing level of contamination in today's fuel, ranging from dust and dirt to shards of metal. Traveling at pressures of up to 30,000 psi, these contaminants can rapidly erode injector nozzles, ruining the spray pattern, lowering fuel economy and reducing power. Without proper protection, the injectors will have to be replaced at a cost of thousands of dollars and days of downtime. That's why you need Fleetguard® filters with **NanoNet®** media. NanoNet provides up to **10x better protection** versus standard filter media, trapping and holding contaminants as small as 4 microns.
